

<b>CHAPTER 1</b>	<b>Introduction to the Wideband TMS320C3x/4x Optimized Math Library</b> .....	3
<b>1.1</b>	Introduction to the Wideband Optimized Math Library .....	3
<b>1.2</b>	Document Contents .....	3
<b>1.3</b>	Revision History .....	4
<b>1.4</b>	Software Reports .....	4
<b>1.5</b>	University Discounts .....	4
<b>CHAPTER 2</b>	<b>Overview of the Wideband TMS320C3x/4x Optimized Math Library</b> .....	5
<b>2.1</b>	Manual Contents .....	5
<b>2.2</b>	Optimized Math Library .....	7
<b>2.3</b>	Definition of a Vector Library .....	7
<b>2.4</b>	Vector Versus Scalar Operations .....	7
<b>2.5</b>	Optimization Principles .....	8
<b>2.6</b>	Basic Striding Concepts .....	8
<b>2.7</b>	Register Contention Issues And The Use Of Index Registers .....	10
<b>2.8</b>	Performance Degradation Resulting From Unequal Striding .....	11
<b>2.9</b>	Wideband's Enhanced Striding .....	11
<b>2.10</b>	Other Implementations .....	12
<b>2.11</b>	Introduction To The Trigonometric Functions .....	13
<b>2.12</b>	Introduction To The Approximation Process .....	13
<b>2.13</b>	Important Relationships When Computing Trigonometric Approximations ...	14
<b>2.14</b>	Reduction of Arguments Supplied To Trigonometric Functions .....	15
<b>2.15</b>	Complex Number Representation .....	16
<b>2.16</b>	Setting Test Code Array Size & Data Type complex .....	17
<b>2.17</b>	Execution Timing .....	19
<b>2.18</b>	A Word of Caution On Theoretical Execution Timing .....	19
<b>2.19</b>	How Timing Benchmarks Are Reported for Vector Routines .....	21
<b>2.20</b>	Scalar Timing Benchmarks .....	21
<b>2.21</b>	Embedding Wideband Routines In PROMs, EPROMs and EEPROMs .....	22
<b>2.22</b>	How Setup and Execution Timing Tables Were Derived .....	23
<b>2.23</b>	Element Count m For The Corrected Number of Executable Iterations .....	23
<b>CHAPTER 3</b>	<b>Installing the Wideband TMS320C3x/4x Optimized Math</b>	

	Library Software .....	25
<b>3.1</b>	Getting Started.....	25
<b>3.2</b>	Package Contents .....	26
<b>3.3</b>	How to Install The Software .....	26
<b>3.4</b>	Software Problem Reports .....	26
<b>3.5</b>	Sample Source Code Optimized Math Library Routine .....	27
<b>CHAPTER 4</b>	<b>Using the Wideband TMS320C3x/4x Optimized Math Library</b>	
	29	
<b>4.1</b>	Getting Started.....	29
<b>4.2</b>	Calling An Optimized Routine Within Your C Code .....	30
<b>4.3</b>	Compiling Optimized Math Library Routines With Your C Code.....	30
<b>4.4</b>	Linking Optimized Math Library Routines With Your C Code .....	31
<b>4.5</b>	Calling Conventions .....	31
<b>4.6</b>	Small Memory Model .....	31
<b>4.7</b>	Big Memory Model.....	32
<b>4.8</b>	Stack Passing Model .....	33
<b>4.9</b>	Register Passing Model.....	34
<b>4.10</b>	Overflow and Underflow Conditions.....	35
<b>CHAPTER 5</b>	<b>Wideband Optimized Math Library Function Descriptions</b>	37
<b>CHAPTER 6</b>	<b>Timing Benchmarks For The Wideband TMS320C3x/4x Opti-</b>	
	<b>mized Math Library</b> .....	277
<b>APPENDIX A</b>	<b>Sample Source Code for the TMS320C3x/4x DSP Processors</b>	
	A-1	
<b>APPENDIX B</b>	<b>Software Problem Report for the TMS320C3x/4x Optimized</b>	
	<b>Math Library</b> .....	B-1
